2025

GREEN GRUNGE

is a bold and revolutionary collection where color and texture take center stage. There is no place for glamour or harmony here - only raw energy and fearless expression. Every leaf in this collection is designed in a grunge style, as sharp and unapologetic as the raspy, dirty guitar riff of Kurt Cobain, making it a striking choice for those who dare to stand out.

Green is not just a color - it’s a revolution. It carries the raw power of nature, the energy of untamed wilderness, and the spirit of defiance. While greenery has long been associated with tranquility, this collection redefines it as a state of revolutionary calm - bold, unshaken, and full of attitude. No sugar-coated greenery, no soft and delicate pastel tones - just pure, unapologetic intensity. There are no **“green snot”** here - only a fearless clash of color and texture.

The collection features:

- Large and expressive monstera leaves
- Banana leaves - huge blades with a dark green color and lengths of up to 2 meters
- Bird’s Nest Fern - the delicate green leaves of this plant resemble chainmail
- Philodendrons - large-leafed plants known for their massive, fleshy leaves that adorn many interiors
- Mirabilis leaves - glossy, dark green leaves of this plant look very elegant.

This collection is the perfect choice for those who embrace boldness and originality.

- Do you want to open a file, select the size, and without worrying bout quality and color, just press the print button?

Welcome!

02

Before we offer our product for sale, we carefully analyze each image using our equipment, print it, check it, and only after we have received a guaranteed high-quality result do we offer it to you.

We save your time!

03

We offer you a comprehensive solution to boost your earnings, expand your product range, venture into new markets, craft a distinctive trade proposal, and cut costs on design teams.

Time spent on our experience is priceless!

Mission

At GigaPixelWalls, we believe that large-format printing should be effortless, high-quality, and profitable. Our mission is to provide you with ultra-high-resolution images that meet the highest industry standards - without compromises in detail, color accuracy, or print clarity.

We do not follow a mass-production approach - every image in our collection is unique. You won’t find our visuals in stock photo banks because we create exclusive, high-resolution artworks tailored for large-format printing.

Our solutions are designed to be intuitive and seamlessly integrate into the workflow of professionals who value quality and uniqueness. For print specialists, our products eliminate the hassle of resolution and quality concerns. For designers and architects, we unlock new creative possibilities, helping transform spaces with stunning, custom visuals.

We offer more than just images - we provide you with the tools to expand your product range, attract new customers, and strengthen your position in the market. Our expertise allows you to reduce costs, streamline production, and focus on growing your business.

Our solutions are specifically tailored for those who prioritize quality and uniqueness. If you value precision and creativity, partnering with us will elevate your offerings, foster innovation, and set new industry standards. Together, we’ll shape the future of large-format printing and design.

We value your time, creativity, and ambition. Thank you for trusting us to be part of your journey. Let’s create something extraordinary together!

- Do you want to open a file, select the size, and without worrying about quality and color, just press the print button?

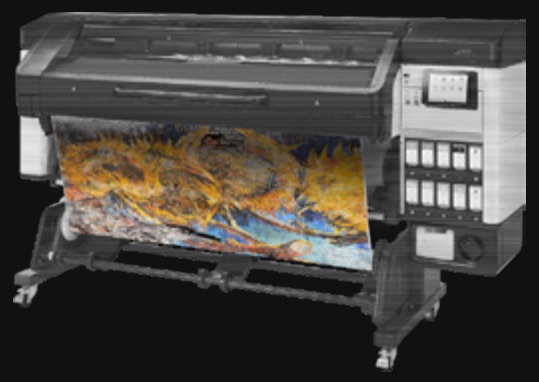
- Welcome!

Wall minds!

GigaPixelWalls - is a unique solution for large format printing. From 1 Gigapixel and more! 300 Dpi, and no less!

Expertise

25 years of experience in: graphic design, 3D visualization, interior design, professional photography, with unique tools, sometimes based on artificial intelligence, and printing/large format printing.



We save your time!

Before we offer our product for sale, we carefully analyze each image using our equipment, print it, check it, and only after we have received a guaranteed high-quality result do we offer it to you.

Time spent on our experience is priceless!

We offer you a comprehensive solution to boost your earnings, expand your product range, venture into new markets, craft a distinctive trade proposal, and cut costs on design teams.

Our tailored approach focuses on maximizing your profitability while broadening your market reach. By leveraging our expertise, you can achieve not only increased revenue but also establish a standout presence in diverse markets.

Our solution isn’t just about saving money; it’s about empowering your business to thrive and innovate. Let us guide you towards a future where your business flourishes, your offerings diversify, and your profits soar.

Partner with us and unlock the potential for unparalleled growth and success in your industry.

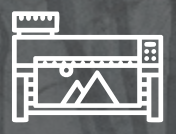
Together, we’ll navigate the landscape, capitalize on opportunities, and position your business as a leader in your field.

- What are we doing?

Next step in the development of your business!

Unique high-resolution images for large-format printing.
Everything that wide format printing companies, interior designers, architects, and decorators need.

Suitable for decorating residential and commercial premises.
As a result, you get the finished product:



WALLPAPER

High-resolution images for large-scale wall use indoors. Formats consider proportions, perspective, and visual coherence.

FRESCOES

Graphics for exterior and interior walls. Consider scale, architecture, and environment.

MURALS

Digital images for textured and relief surfaces. Consider material and surroundings.

INTERIOR POSTERS

High-resolution images for poster printing. Standalone or coordinated with interior design.

VINYLOGRAPHY

Images for vinyl on storefronts, furniture, glass, plastic. Prepared by object geometry and usage conditions.

TEXTILE DECOR

Graphics for fabric printing on upholstery, curtains, bedding. Adapted for fabric texture and density.

Product not available in photo banks!

Large applicable in any print format!

Suitable for decorating residential and commercial premises. Images are adapted for various types of large format printing:

LATEX | RESIN

Latex and resin printing technologies use water-based inks to produce vibrant, odorless, and environmentally friendly prints suitable for both indoor and outdoor applications.

SOLVENT

Solvent printing technology uses solvent-based inks to produce vibrant, durable, and weather-resistant prints, ideal for outdoor signage and large-format graphics.

UV

UV printing technology uses ultraviolet light to instantly cure or dry the ink, allowing for high-quality, durable prints on a wide range of materials, including non-porous surfaces.

DTG | SUBLIMATION

DTG prints high-resolution designs directly on cotton, while sublimation uses heat to dye polyester for vibrant, long-lasting results.

All images in this collection are available in two resolution and pricing options:

300 dpi - For high-quality printing on premium materials, whether smooth or with a subtle texture. Suitable for both photo wallpapers and self-adhesive materials.

150 dpi - Optimized for budget-friendly printing on affordable materials with a pronounced, deep texture.

All images have undergone high-quality color correction using calibrated HP equipment. Each image includes an embedded calibrated sRGB profile, ensuring the closest possible match to modern printing equipment color profiles.

GREEN GRUNGE

by GigaPixelWalls

Image index - GPW-GRGR-015

Image size - 6 x 3 m. / 236.22 x 118.11 in.

A fragment of the image, cut at its original resolution, demonstrating the actual print quality at a specified dots per inch (dpi).
This crop allows you to:
Evaluate detail, sharpness, and color accuracy before full-scale printing.
Check how the image appears on the selected material at a specific resolution (e.g., 300 dpi or 150 dpi).
Ensure there are no artifacts, blurriness, or other unwanted effects caused by scaling.
The crop is usually provided at 100% scale to show the exact representation of the final print.

All images in this collection are available in two resolution and pricing options:
300 dpi - For high-quality printing on premium materials, whether smooth or with a subtle texture. Suitable for both photo wallpapers and self-adhesive materials.

150 dpi - Optimized for budget-friendly printing on affordable materials with a pronounced, deep texture.
All images have undergone high-quality color correction using calibrated HP equipment. Each image includes an embedded calibrated sRGB profile, ensuring the closest possible match to modern printing equipment color profiles.

GREEN GRUNGE

by GigaPixelWalls

Image index - GPW-GRGR-033

Image size - 6 x 3 m. / 236.22 x 118.11 in.

A fragment of the image, cut at its original resolution, demonstrating the actual print quality at a specified dots per inch (dpi).
This crop allows you to:
Evaluate detail, sharpness, and color accuracy before full-scale printing.
Check how the image appears on the selected material at a specific resolution (e.g., 300 dpi or 150 dpi).
Ensure there are no artifacts, blurriness, or other unwanted effects caused by scaling.
The crop is usually provided at 100% scale to show the exact representation of the final print.

All images in this collection are available in two resolution and pricing options:
300 dpi - For high-quality printing on premium materials, whether smooth or with a subtle texture. Suitable for both photo wallpapers and self-adhesive materials.

150 dpi - Optimized for budget-friendly printing on affordable materials with a pronounced, deep texture.
All images have undergone high-quality color correction using calibrated HP equipment. Each image includes an embedded calibrated sRGB profile, ensuring the closest possible match to modern printing equipment color profiles.

GREEN GRUNGE

by GigaPixelWalls

Image index - GPW-GRGR-051

Image size - 6 x 3 m. / 236.22 x 118.11 in.

A fragment of the image, cut at its original resolution, demonstrating the actual print quality at a specified dots per inch (dpi).
This crop allows you to:
Evaluate detail, sharpness, and color accuracy before full-scale printing.
Check how the image appears on the selected material at a specific resolution (e.g., 300 dpi or 150 dpi).
Ensure there are no artifacts, blurriness, or other unwanted effects caused by scaling.
The crop is usually provided at 100% scale to show the exact representation of the final print.
